

Network Behavior Analysis

EXPERIENCE

- ▶ Partnership with major suppliers of IT solutions.
- ▶ Permanent testbed in large university network (> 14,000 computers, >250,000,000 records processed per day, lightly policed network – at least 10 % of traffic is problematic).
- ▶ Very close working relationship with university research groups and we incorporate the results of this research into our solutions on an ongoing basis.
- ▶ We follow the European Network and Information Security Agency (ENISA) guidelines closely.

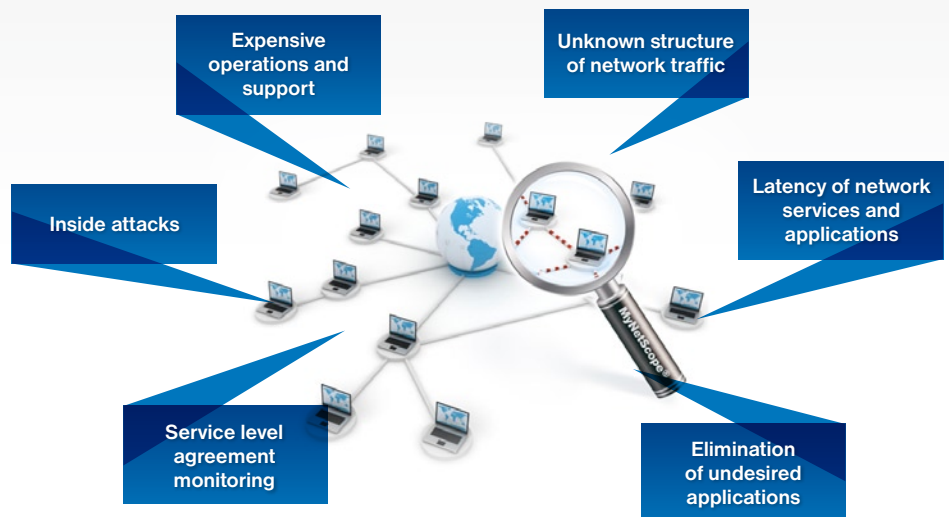

OUR MISSION

Advanced IT infrastructure control:

do it better, safer,
easier and cheaper

OUR FOCUS

OUR PORTFOLIO

Will help you to detect and isolate problems before they bite

Solutions

- **MyNetScope® NSM Solution** – complete solution for network security and IT infrastructure monitoring

Services

- **NetHound** – remote network anomaly detection and behavior analysis service
- **Network Traffic Audit** – comprehensive traffic analysis of customer network

Products

- **FlowMon ADS** – plug&play network anomaly detection and behavior analysis system
- **MyNetScope® ADS** – enterprise network anomaly detection and behavior analysis system
- **MyNetScope® OTRS** – incident handling and documentation

OEM

- **Adva ADS** – software module as add-on to third party product portfolio
